

Elegant and pure:
HOPPE mini roses

For all HOPPE door and window handles ...

Purism in the details: HOPPE mini roses

Quick-Fit

Mini roses show door handles in a completely new light. They are hardly noticeable on the door. As a result, the handle itself becomes more prominent, creating a fascinating interplay between the handle and the door.

Interior door sets with mini roses are currently available in stainless steel and brass. A standard door set consists of a pair of door handles and the matching handle roses. Escutcheons, which are also available in a special version for bathroom doors, can be added if required.

All sets are fitted with the patented **HOPPE Quick-Fit connection**, which enables the door handles to be assembled quickly and easily without any tools and ensures a firm fit. The key point of the proven technology is the blocking mechanism, developed by HOPPE, in the door handle receiver component. It holds the solid spindle of the other handle firmly and without play. Simply attach the mini roses and plug in the door handles – all done!

Naturally, HOPPE's interior door sets with mini roses also come with a 10-year operational guarantee.

Choose the right handle shape for you from our modern range and enjoy the pure design of door and handle.

Door preparation and assembly, Explanation of attributes

Door preparation

Accurate door preparation is required since the size of the roses has been reduced to a minimum.

The hole for the handle must be 22 mm in diameter. A special drill or CNC machine is recommended for optimum results.

- Door preparation for HOPPE handle sets on mini-rose without escutcheons

- Door preparation for HOPPE handle sets on mini-rose with escutcheons

- Door preparation for HOPPE handle sets on mini-rose with emergency release and turn for bathroom/WC doors

Assembly

The handle roses are fastened to the door by putting the door handles together thanks to the **HOPPE Quick-Fit connection**.

The M846S escutcheons just need to be plugged together. To attach the MSK91/845S/OL45 bathroom/WC roses, plug the emergency release and turn together and fasten using a grub screw. In both cases, silicone helps to keep the escutcheons fixed to the door.

ARRONE®

The **complete** range.

ARRONE – developing and enhancing the product range

Under the ARRONE brand name, HOPPE Group offers a comprehensive range of architectural quality door and window hardware along with accessories. Many products are manufactured exclusively by leading hardware manufacturers throughout the world. Within this extensive range are door closing devices, panic and emergency exit devices, hinges, rim and mortice locks, door and pull handles, access control, signage and accessories. ARRONE products are designed and manufactured to complement the HOPPE range of aluminium, brass, stainless steel and nylon door and window hardware.

Magnetic locks

Magnetic locks are used where a protruding latch and a visible strike plate would be obtrusive. They ensure low-noise and smooth use of interior door handle sets. Above all, they impress with their flush design. When the door is open, the latch remains completely concealed in the lock case. When the door is closed, the latch springs into the strike plate of the door frame. By pushing down the handle, the latch is retracted from the striking plate and the door can be opened.

ARRONE magnetic locks perfectly complement HOPPE handles – especially those with minimalistic mini roses. A range of contemporary colours matches the handles sets, including matt black, matt white and copper finishes.

AR3313

ARRONE magnetic bathroom lock:

- Function: Deadbolt operation
