Escobillas de baño y guardar rollos	106
Estantes	107
Topes para puerta	108
Señalética	110

Didheya:
We are manufacturers

At Didheya, we offer a complete and responsive service that is sensitive to the market's needs. We are a company with more than 30 years of experience in the world of design and production of stainless steel products. Our products are distributed around the world, in both architectural projects – housing and public buildings – and transport –metros, buses, trams and lifts.

Didheya:
Somos fabricantes

En Didheya ofrecemos un servicio integral, cercano y sensible a las necesidades del mercado. Somos una empresa con más de 30 años de experiencia en el mundo del diseño y la producción de elementos en acero inoxidable. Nuestros productos se pueden encontrar repartidos por todo el mundo, tanto en proyectos arquitectónicos –viviendas o edificios públicos– como en vehículos de transporte –metros, autobuses, tranvías o ascensores–.

Mecanizado, pulido y pintura son los principales procesos de fabricación en Didheya.

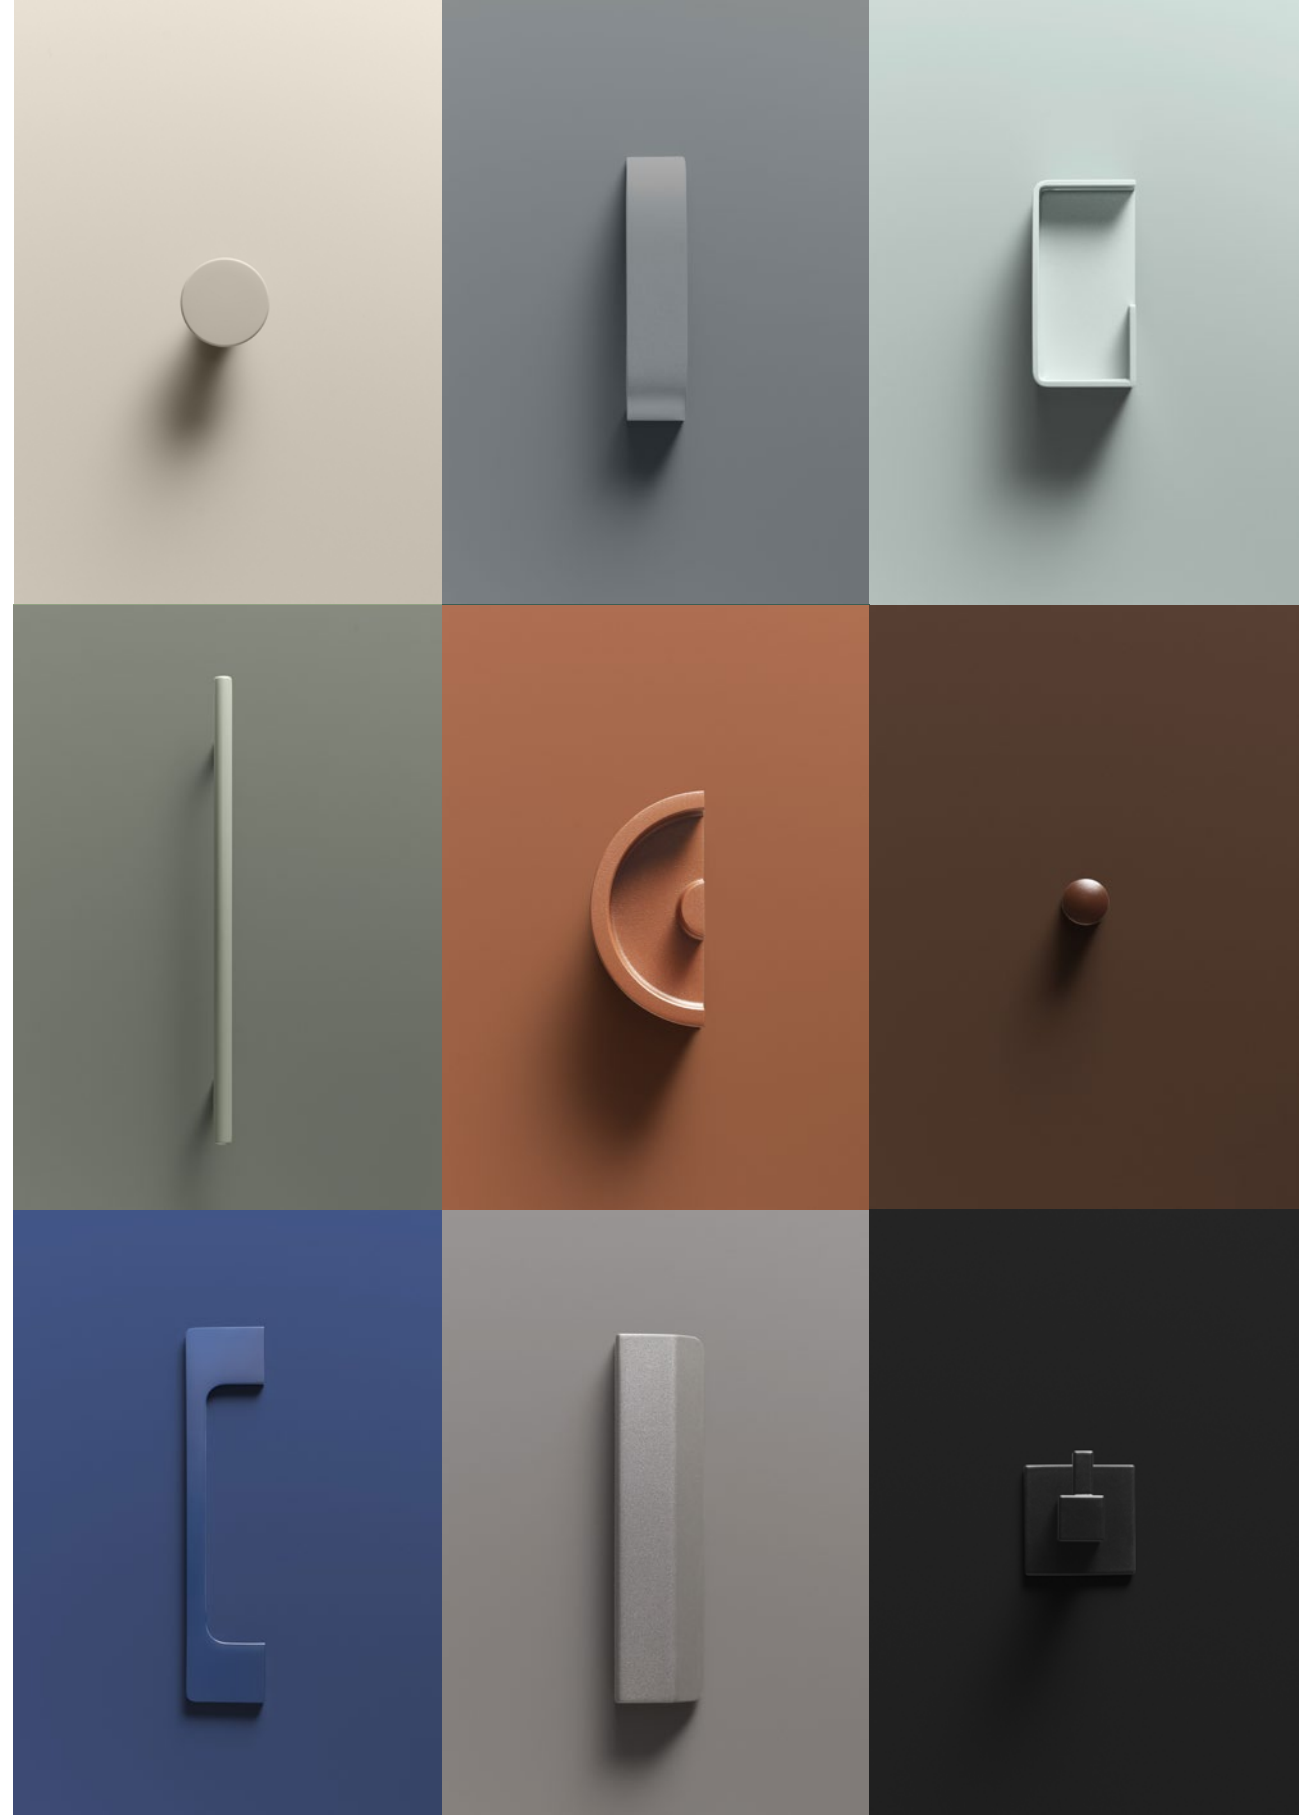

Machining, polishing and painting are Didheya's main manufacturing processes.

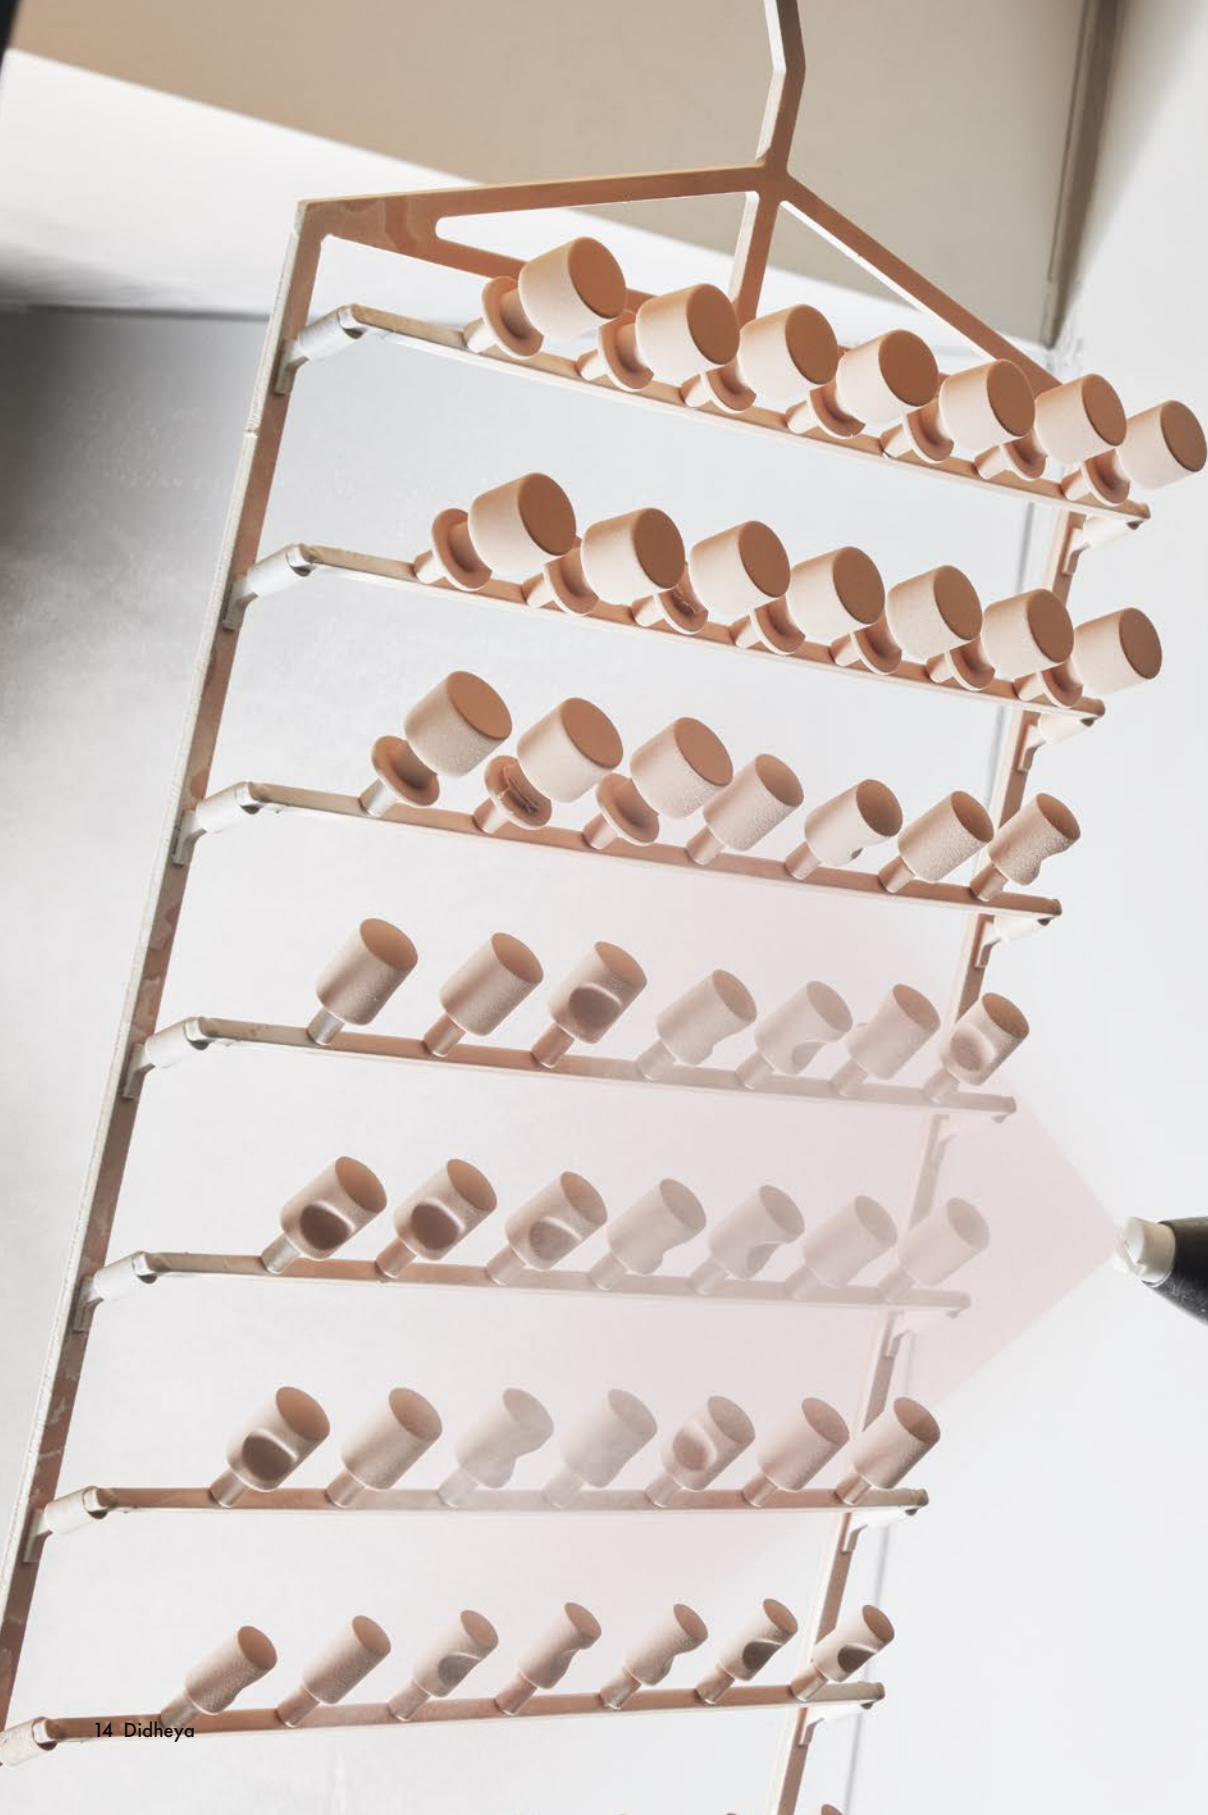

Pure Metallics, Colours & Neutrals

A range of colours and finishes applicable to all the products in the collection, which has been developed to offer new solutions to architects, interior designers and decorators, to improve the creation of spaces, broaden their options and enable big changes through small details. A palette of colours that consists of two types of finish: the “Pure Metallics” showcase the part’s metallic appearance, and “Neutrals” and “Colours”, which cover the part completely.

Pure Metallics, Colours & Neutrals

Una gama de colores y acabados aplicable a todos los productos de la colección que nace con el objetivo de aportar nuevas soluciones a arquitectos, interioristas y decoradores; para mejorar la creación de espacios, amplificando las opciones y posibilitando grandes cambios con pequeños detalles. Una propuesta de colores que se compone de dos tipos de acabados: Los «Pure Metallics» que permiten apreciar el aspecto metálico de la pieza, y los «Neutrals» y «Colours», que cubren esta en su totalidad.

The installation of an electrostatic coating system at our plant is the latest stage in our concept of a global service: not only can we listen to and act on our clients' needs and those of the market, but also, we have complete control over the manufacturing process and the quality of our products.

La incorporación de una cadena de pintura electrostática a nuestras instalaciones ha sido el último paso en nuestra forma de entender un servicio global: no sólo nos permite escuchar y hacer realidad las necesidades de nuestros clientes y del mercado, sino también, controlar el proceso de fabricación y la calidad de nuestros productos de forma íntegra.

Custom colours

The production of electrostatic coating finishes not only allows us to launch new colour palettes. It also means we listen, adapt and manufacture according to the needs and tastes of our clients. Didheya's custom colours service means we can create unique parts for specific projects.

Colores a medida

La producción de acabados con pintura electrostática no solo permite lanzar nuevas líneas de colores. También, escuchamos, nos adaptamos y fabricamos según las necesidades y gustos de nuestros clientes. El servicio de colores personalizado de Didheya permite crear piezas únicas para proyectos concretos.

New Designs

Design is the process through which we continually innovate and improve, imagining and building new pathways. Recently we started a collaboration with the designers Iratzoki & Lizaso to develop new products that will soon be launched.

Nuevos Diseños

El diseño es el proceso mediante el cual innovamos y mejoramos de manera continua, imaginando y construyendo nuevos caminos. Recientemente, hemos iniciado una colaboración con los diseñadores Iratzoki & Lizaso para el desarrollo de nuevos productos que en breve verán la luz.
