## Highly fashionable: aluminium architectural fittings in matt black

AI

There is a good reason why black is such a popular colour for door and window handles – depending on how they are combined, they can create very different effects in living spaces: elegant and unobtrusive or high-contrast and vibrant.

Lovers of black will find a large selection of different door fittings and window handles at HOPPE, such as aluminium architectural fittings in black matt, which are available from us in the colour designation F9714M.

Many of HOPPE's most popular series such as Dallas, Tôkyô and Toulon are available in F9714M – in many cases both as a door handle set and as window handles, available with or without burglary-resistant technology.

The HOPPE architectural fittings in black matt are manufactured from aluminium, an ideal material for door and window handles. The natural corrosion protection that forms when the material is processed makes aluminium architectural fittings extraordinarily resistant to environmental influences and mechanical damages. Furthermore, aluminium handles have no adverse effects on health whatsoever and can be fully recycled without loss of quality. Aluminium architectural fittings do not require special care – any dirt can be removed quite simply using a damp cloth.

Like all HOPPE products, handles in the colour F9714M are made in Europe and are covered by a ten-year guarantee on mechanical operation. After all, HOPPE architectural fittings are brand products – which HOPPE considers a promise of quality.
